## **25 June 2019**

# South Africa - Weather

- Any harvesting that is not yet finished will advance swiftly during the next two weeks
- Rainfall this week will be too light to significantly impact long-term soil conditions
- Soil moisture will remain dry to critically dry in much of the country
- Winter wheat conditions will remain less than favorable to poor for Western Cape, Free State, and neighboring areas
- The brief periods of light rain in Western Cape in recent weeks did not have a significant impact on establishment and development
- Free State initially saw timely rain as the crops were getting into the ground before trending drier biased in recent weeks
- Timely rain will be needed later in July to improve development conditions in most locations

SOUTH AFRICA

# United States of America - Weather

**U.S. MIDWEST:** Heavy rain and some flooding occurred in the southwestern Corn Belt during the weekend with moderate to heavy rain and local flooding from central Iowa to central and southern Illinois, southwestern Indiana, and western through interior eastern Kentucky. Large parts of Michigan and much of Ohio were dry during the weekend and some planting likely occurred while rain fell on most of the remainder of the Midwest and some planting likely occurred around the precipitation. Many areas will have opportunities for planting today before rain increases this weekend into next week and slows fieldwork in much of the region.

**U.S. DELTA AND SOUTHEAST:** The southern Delta into the southern half of Alabama and northern Florida were mostly during the weekend while rain fell on most other areas except for central into eastern North Carolina and south-central to southeastern Virginia.

# South America - Weather

**BRAZIL:** The weather pattern in Brazil and Paraguay not change much through the next two weeks and a restricted rainfall pattern will be in place most often with a few rounds of showers and thunderstorms in the south and regular rounds of showers in the northeast near the coast.

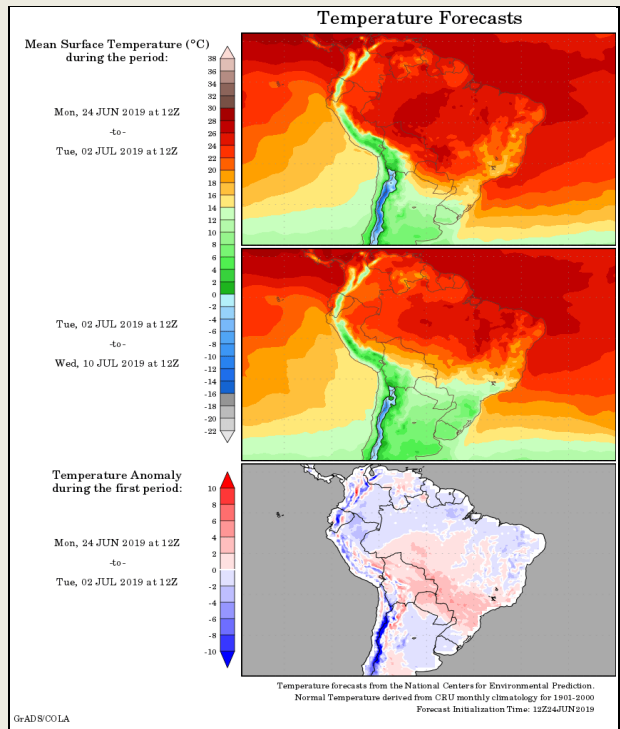

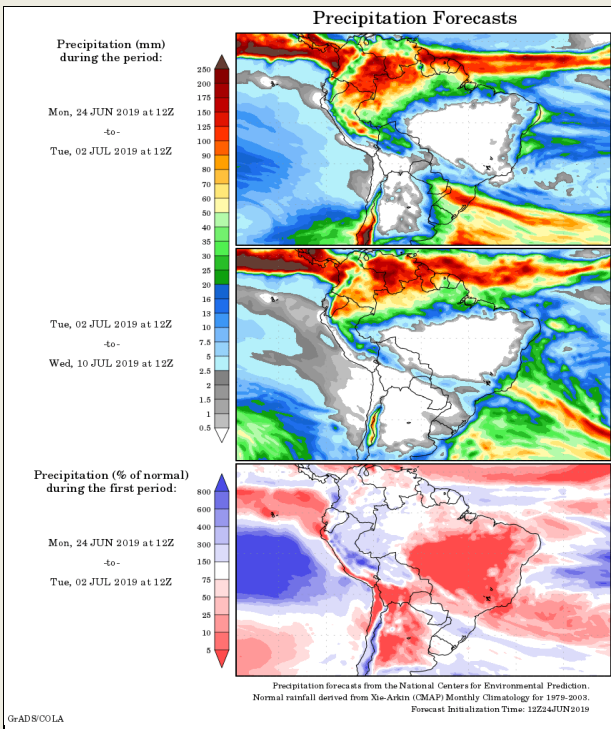

**ARGENTINA:** Outside of some rain today, Argentina will see a restricted rainfall pattern most often through the next two weeks and planting of winter wheat and harvesting of summer crops should advance well overall. The drier areas in southwestern Argentina remain in need of greater rain to improve conditions for winter wheat.

## Europe, New Zealand and Australia - Weather

**EUROPE:** Restricted precipitation and hot temperatures will occur from Spain into France into the U.K. Italy, Germany, Denmark, the Czech Republic and Poland this week. Drying will occur this week and firming of soil conditions will occur throughout the region and some crop stress may evolve later this week. Daily highs will vary in the upper 80s and 90s most often with extremes just exceeding 100 Fahrenheit this week. The hottest conditions will occur over west-central France Tuesday into Saturday when highs will vary in the 90s and exceed 100 Fahrenheit most often. Any moisture that occurs will be brief and erratic and lost quickly to evaporation.

**AUSTRALIA:** Precipitation will continue to impact Western Australia and the southeast corner of the nation this week. The moisture will continue to support improvements in soil moisture and crop conditions in Western Australia, but the best conditions will continue in the southeast corner of the nation. Warmer than usual temperatures will occur this week excepting the southwest and southeast corners of the nation.
