BDLive - The rand and local bonds firmed on Wednesday as commodity prices paused their recent descent, with gold up nearly 2% as markets await the minutes of the latest US Federal Reserve meeting.

Gold gained the most since early March on Wednesday and at 6.50pm was up 1.89% to \$1,792.83 an ounce while platinum was up 1.18% to \$1,021. World stocks steadied around the week's lows with the mood dampened by inflation worries ahead of US consumer price data later on Wednesday, with economic recovery in many countries keeping oil prices near multiyear highs.

September US consumer price index (CPI) is forecast to show a monthly gain of 0.3%, according to a Reuters poll. Minutes of the US Federal Reserve's September policy meeting are also due later, while JPMorgan will be the first major bank to report at the unofficial start of the company earnings season.

Commodities

	Last	Value Change	% Change
Platinum	1014.50	-5.60	-0.55%
Gold	1789.11	-3.54	-0.20%
Silver	22.93	-0.14	-0.59%
Copper	4.50	-0.02	-0.38%
Gasoil	724.50	1.25	0.17%
Brent Oil	83.24	0.06	0.07%

BDLive - Bengaluru — Gold prices held steady on Wednesday, helped by a slight pullback in dollar, while investors awaited US inflation data to gauge the Federal Reserve's path on normalising policy.

Spot gold was little changed at \$1,760.26/oz by 3.05am GMT, while US gold futures rose 0.1% to \$1,760.60.

The dollar index, which measures the greenback against six rivals, was down 0.2%, easing off from an over one-year high hit on Tuesday.

"We're going to get US CPI (consumer price index) data as well as those critical minutes from the September FOMC (Federal open market committee) meeting, so I think there is capacity there for gold to get a directional catalyst after this period of consolidation," DailyFX currency strategist Ilya Spivak said.

SEP 2022	524.00	517.75	The record	-6.25	517.50	-0.25	-6.50

FarmFutures - Corn prices started Wednesday's session with mild overnight losses, which blossomed into a drop of more than 2% by the close. Traders mostly shrugged off a large sale announced to unknown destinations, choosing to engage in a round of technical selling on the heels of Tuesday's WASDE report. December futures dropped 11.25 cents to \$5.1125, with March futures down 11 cents to \$5.21.

Corn basis bids were steady to firm on Wednesday after rising 2 to 10 cents higher across half a dozen Midwestern locations today.

Private exporters announced to USDA the sale of 6.4 million bushels of corn for delivery to unknown destinations during the 2021/22 marketing year, which began September 1.

In yesterday's crop progress report from USDA (delayed a day due to office closures on Columbus Day), the agency noted corn harvest moved from 29% a week ago up to 41% through October 10. That's a bit above 2020's pace of 39% and well above the prior five-year average of 31%. USDA reports 94% of the crop is now fully mature, up from 88% a week ago and trending eight points above the prior five-year average of 86%.

Quality ratings improved by a point, with 60% of the crop rated in good-to-excellent condition. Analysts though USDA would hold ratings steady. Another 25% is rated fair (down a point from last week), with the remaining 15% rated poor or very poor (unchanged from a week ago). Preliminary volume estimates were for 318,640 contracts, trending slightly higher than Tuesday's final count of 285,413.

FarmFutures - Wheat prices followed corn and soybeans lower on a round of technical selling today. Spring wheat contracts only suffered a minor setback, while winter wheat contracts faced double-digit cuts. December Chicago SRW futures dropped 16.25 cents to \$7.1775, December Kansas City HRW futures fell 18.25 cents to \$7.1775, and December MGEX spring wheat futures slid 3.75 cents lower to \$9.5125. Winter wheat plantings kept pushing forward last week, with 60% completion through October 10. That's up from 47% a week earlier and mirrors the prior five-year average, although it was one point behind the average trade guess of 61%. And 31% of the crop is emerged, which is up from the prior week's mark of 19% but four points behind the prior five-year average of 35%.

Russia's agriculture ministry reports that the country's 2021 wheat harvest is complete across 67.213 million acres with a production of 2.807 billion bushels through October 12. Harvest pace is a bit sluggish compared to a year ago.

Preliminary volume estimates were for 91,120 CBOT contracts, slipping slightly below Tuesday's final count of 94,528.

FarmFutures - Soybean prices failed to hold onto modest overnight gains, sliding around 0.25% lower on a round of technical selling that was largely triggered by spillover weakness from corn and wheat. November futures dropped 1.5 cents to \$11.9675, with January futures down 3 cents to \$12.07.

Soybean basis bids were steady to firm after tilting 3 to 10 cents higher across four Midwestern locations on Wednesday.

Private exporters announced to USDA two large soybean sales today. The first was for 12.1 million bushels of soybeans to China, and the second was for 7.3 million bushels of soybeans to unknown destinations. Both sales are for delivery during the 2021/22 marketing year, which began September 1.

The 2021 soybean harvest has nearly reached the halfway mark, with 49% complete through Sunday. That is well behind 2020's pace of 58% but still nine points ahead of the prior five-year average of 40%. Ninety-one percent of the crop is dropping leaves, versus 86% a week ago and slightly ahead of the prior five-year average of 89%. Preliminary volume estimates were for 342,566 contracts, moving slightly ahead of Tuesday's final count of 320,741.
