BDLive - The JSE tracked firmer global markets on Tuesday, which rebounded after a sharp drop by tech stocks on Monday.

Monday's sell-off came as investors continued their rotation out of technology stocks to energy and fixed income amid renewed inflation fears. World shares edged off the previous days lows on Tuesday as worries that rising oil prices will feed inflationary pressures appeared to ease, while the dollar regained strength before US payrolls data on Friday that is seen as key to the Federal Reserve's next move.

The MSCI's gauge of global stocks rose 0.6% by 3.09pm GMT, off a more than three-month low hit during Asian trading.

European stocks gained 0.8% as rising bank stocks and an encouraging earnings update from chipmaker Infineon calmed nerves after a tech-fueled sell-off on Monday.

BDLive - Bengaluru — Gold fell on Tuesday as the dollar rose, but concerns that rising energy prices could dampen economic activity dented appetite for riskier assets and kept bullion close to a more than one-week peak hit in the previous session.

Spot gold fell 0.4% to \$1,761.69 an ounce by 2.54am GMT, after hitting \$1,770.41 on Monday, its highest since September 23. US gold futures were 0.3% lower at \$1,762.30.

The dollar index rose, making gold more expensive for those holding other currencies, while equity markets slid on concerns about rising inflation. Subdued shares are prompting some Asian investors to buy the dollar, pressuring gold, said Jeffrey Halley, senior market analyst for Asia-Pacific at Oanda, adding gold would be in a choppy \$1,750-\$1,785.00 range ahead of the US nonfarm payrolls data on Friday.
